

Ronaldas Macas

MacasR@cardiff.ac.uk

QUALIFICATIONS

Cardiff University, Cardiff, Wales, UK

PhD., Gravitational Physics, expected 2020

- Thesis title: “Detection, Reconstruction and Interpretation of Gravitational-Wave Bursts”

University of Glasgow, Glasgow, Scotland, UK

MSci., Physics and Astronomy, 2010-2016

- First class degree
- Thesis title: “Investigating an Alternative to Dark Matter: Timescape Cosmology”

PROFESSIONAL EXPERIENCE

Cardiff University, Cardiff, UK

Gravitational-Wave Burst Signal Interpretation 2016+

- Developed an algorithm to interpret an unknown gravitational-wave signal using reconstructed waveform
- Tested the method with multiple toy models and astrophysical sources such as GW150914
- Derived theoretical basis for Bayesian parameter estimation with the algorithm

Search for Gravitational-Wave Signals Associated with Gamma-ray Bursts 2016+

- Lead person for offline gravitational-wave burst search
- Analysed gamma-ray burst triggers during LIGO-Virgo Observing runs 2 and 3a
- Member of collaboration paper writing teams for Observing runs 2 and 3a

Bayesian Inference Analysis of Unmodelled Gravitational-Wave Transients 2014-2019

- Investigated BayesWave performance in three key areas: sky localisation accuracy, signal/noise discrimination, and waveform reconstruction
- Produced a code to perform binary black hole signal injections in LIGO/Virgo data used for the study
- [Pannarale, Macas & Sutton, CQG, 36 \(2019\)](#)

University of Glasgow, Glasgow, UK

Galaxy Catalogue for Multi-Messenger Search with Advanced LIGO and Virgo 2014-2018

- Developed an algorithm to combine multiple galaxy catalogues
- The final GLADE catalogue was used for multiple studies to estimate Hubble constant H_0
- [Dalya et al., MNRAS, 479 \(2018\)](#)

LIGO Hanford Observatory, Hanford, WA, USA

LIGO Fellowship on Live Noise Budget at Hanford Observatory 2018 March-July

- Improved the noise budget software used for detector characterisation at Hanford
- Updated and added multiple noise sources ([link to aLOG](#))
- [M. Tse et al., PRL submitted, \(2019\)](#)

Albert Einstein Institute, Hannover, Germany

Search Parameters for Continuous Gravitational-wave algorithm StackSlide 2015 June - August

- Created a tool to estimate cost-effective search parameters for continuous gravitational-waves

- Investigated non-linear relation of SNR loss vs metric mismatch
- Presented at LIGO-Virgo Budapest meeting by Dr. Reinhard Prix ([DCC link](#))

INVITED RESEARCH VISITS

June 2018: Penn State University, University Park, PA, USA

SCIENTIFIC TALKS AND PRESENTATIONS

July 2019: Amaldi/GR22, Valencia, Spain

“Search for Gravitational Waves Associated with Gamma-Ray Bursts During the Second Advanced LIGO-Virgo Observing Run”

July 2019: Amaldi/GR22, Valencia, Spain

“Unmodeled Source Reconstruction with Gravitational Waves”

July 2019: National Astronomy Meeting, Lancaster, UK

“Search for Gravitational Waves Associated with Gamma-Ray Bursts During the Second Advanced LIGO-Virgo Observing Run”

June 2018: Invited seminar talk at the Institute for Gravitation and the Cosmos, Penn State University, PA, USA

“Gravitational-wave Bursts: Searching for the Unknown”

May 2018: LIGO Washington Meeting, Hanford, WA, USA

“Live Noise Budget”

July 2017: National Astronomy Meeting, Hull, UK

“Gravitational Wave Search Using Gamma-ray Bursts with Advanced LIGO”

July 2017-September 2019: numerous talks at LIGO-Virgo collaboration meetings

PARTICIPATION IN SCHOOLS, WORKSHOPS AND CONFERENCES

July 2019: Summer School on Neutron Star Modeling, Southampton, UK

August 2017: Summer School on Gravitational Wave Astronomy, St Andrews, UK

September 2019: Workshop “The Astrophysical Implications of Gravitational Wave Detections”, Warsaw, Poland

March 2018: Workshop “First Multi-Messenger Observations of a Neutron Star Merger and its Implications for Nuclear Physics”, Seattle, WA, USA

September 2019: LIGO-Virgo-KAGRA meeting, Warsaw, Poland

September 2018: LIGO-Virgo meeting, Maastricht, Netherlands

May 2018: BayesWave F2F meeting, Huntsville, AL, USA

March 2018: LIGO-Virgo meeting, Sonoma, CA, USA

September 2017: LIGO-Virgo meeting, Geneva, Switzerland

April 2017: BritGrav, Oxford, UK

September 2016: LIGO-Virgo meeting, Glasgow, UK

GRANTS AND FUNDING

May 2017: Long Term Attachment Grant for LIGO Fellows Program, STFC. Support for 4-month research visit to LIGO Hanford observatory. £4,851

March 2018: Support to attend INT-JINA Symposium “First Multi-messenger Observations of a Neutron Star Merger and its Implications for Nuclear Physics”, RAS, £700

September 2017: Support to attend LIGO-Virgo meeting in Geneva, Switzerland, IoP, £150

TECHNICAL SKILLS

Computer Programming: Matlab, Python, Bash Shell Scripting, LINUX, git
Computer Applications: L^AT_EX, vi

MARKING AND DEMONSTRATING

2016-19: PX4128 Data Analysis

2018-19: PX3143 Computational Physics

2016-17: PX3241 Particle Physics and Special Relativity

GRADUATE TRAINING COURSES

Practical Project Management for Your Research

Thinking Outside the Box and Your PhD

Abstracts: How to write them in the Sciences

Turbocharge Your Writing

Seven Secrets of Highly Successful Researchers

Rapid Reading

Assesing Student Learning in the Sciences

Teaching Diverse Learners

PUBLIC OUTREACH

GW170817-GRB 170817A announcement:

- News article for STEM public outreach website ([link](#), only in Lithuanian)
- Radio interview ([link](#), only in Lithuanian)

VOLUNTEERING

Cardiff University Men’s Basketball Club President 2018-2019

- Grant application
- Organise weekly basketball sessions
- Arrange table officials and referees for University league games

SELECTED PUBLICATIONS

I have authored or co-authored 40+ papers in total, h -index = 23. As a member of LIGO, I am a co-author on the major discovery papers released since 2017. I highlight here 5 papers to which I have directly contributed.

1. B. P. Abbott et al. Search for Gravitational-wave Signals Associated with Gamma-ray Bursts During the Second Observing Run of Advanced LIGO and Advanced Virgo. 2019. *Astrophys. J. Accepted*
Produced Figures 4 and 5, Tables 1 and 2. Wrote Unmodelled Search Results, Discussion and a part of Conclusions sections.
2. F. Pannarale, R. Macas, and P. J. Sutton. Bayesian Inference Analysis of Unmodelled Gravitational-wave Transients. *Classical and Quantum Gravity*, 36(3):035011, Feb 2019
Produced a code to perform binary black hole signal injections in LIGO/Virgo data used for the study. Estimated the mismatch between injected and reconstructed waveforms. Wrote the abstract, part of Procedure and Results, and Summary and Conclusions sections.
3. G. Dalya, G. Galgoczy, L. Dobos, Z. Frei, I. S. Heng, R. Macas, C. Messenger, P. Raffai, and R. S. deSouza. GLADE: A galaxy catalogue for multimessenger searches in the advanced gravitational-wave detector era. *Monthly Notices of the Royal Astronomical Society*, 479(2):23742381, Jun 2018.
Developed an algorithm to combine multiple galaxy catalogues. Wrote a part of Catalogue Compilation and Statistics section.
4. B. P. Abbott et al. Gravitational Waves and Gamma-rays from a Binary Neutron Star Merger: GW170817 and GRB 170817A. *Astrophys. J.*, 848(2):L13, 2017.
Performed unmodelled gravitational waves search with X-pipeline for GW170817.
5. M. Tse et al. The quantum-enhanced Advanced LIGO detectors in the era of gravitational-wave astronomy. *PRL submitted*. [DCC link](#).
Improved noise detection software and included additional noise sources which led to a better understanding of the detector before and throughout LIGO Observing Run 3.
